APOS-06

POS Power.

with Zero Monthly Fees.

POWERED BY OPTIMA GoPOS™

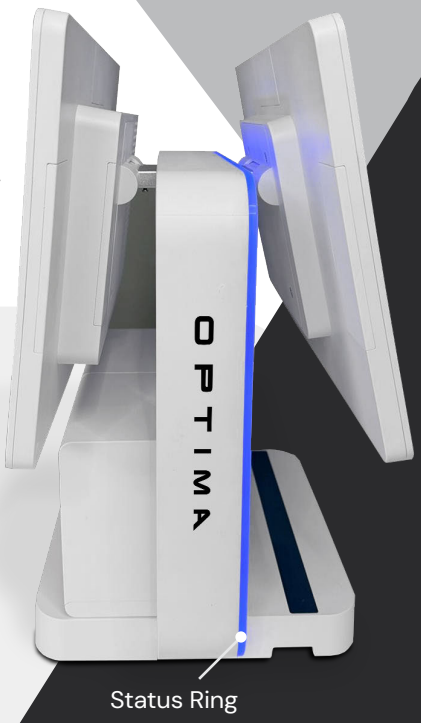

OPTIMA

Built for Business

& Ready for Rush Hour.

The Optima **APOS-06®** delivers the speed, reliability, and power businesses expect from a high-performance POS system—without contracts, subscriptions, or hidden fees. With built-in Wi-Fi, Bluetooth, a high-speed thermal printer, a programmable full-color **Status Ring** that visually indicates the machine's status, and **GoPOS** pre-installed exclusively on APOS hardware, businesses get a complete, ready-to-use POS system right out of the box (payment processor and PIN pad not included). It integrates seamlessly with **Honeywell**, Datalogic, **Zebra**, **Netum**, **Berg**, **Microplus**, and the full line of **OPTIMA** peripherals for a unified, fully compatible APOS ecosystem.

Works with Leading Hardware & Industry Systems

Pay Once. Zero Monthly Fees

While many POS providers advertise "free" systems that lock businesses into costly subscriptions, the Optima APOS Series delivers full POS capability for a one-time purchase with lifetime updates, including frequent new features and Performance improvements, at no additional cost, creating long-term savings that grow year after year.

Major Gateway Support

Through Datacap, the Optima APOS Series® connects to major US and Canadian processors, with smooth compatibility across PAX, Global, Moneris, TD Bank, PayFacto, and thousands of ISOs. Payments are handled by your chosen processor using a separate PIN pad. **Optima provides the POS system, not the payment processing.**

Service in Seconds

The **APOS-06®** is built around a fully modular architecture. Every major component — from the customer display to the mainboard — is designed to be replaced quickly and independently.

The built-in LED **Status Ring** ring gives customers instant visual feedback during the checkout process.

STATUS RING

Powered by

GoPOS®

Optima GoPOS® comes built into every APOS system, delivering fast, reliable performance for retail and restaurant environments. It includes essential tools like stock control, table mapping, employee time tracking, and customizable workflows that adapt to any business. **GoPOS is pre-installed and exclusive to Optima APOS hardware.**

GoPOS® evolves continuously with updates that deliver new features, refinements, and security enhancements. With email receipts, automated reporting, and an intuitive interface, it keeps daily operations simple and efficient.

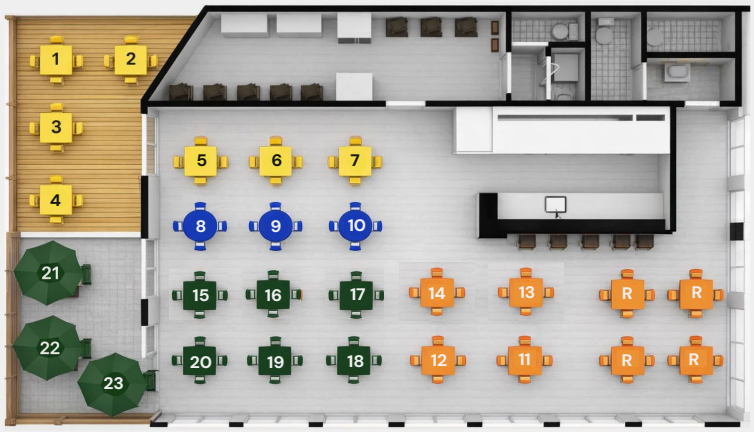

Table Mapping

Thanks to the new PCProg® table mapping, staff always know what's happening on the floor, allowing them to seat guests quicker, avoid delays, and maintain a smooth, professional flow during peak hours.

Core Features

- **UNLIMITED Products**
- **UNLIMITED Departments**
- **UNLIMITED Tenders**
- **UNLIMITED Keyboards**
- **Stock control**
- **Table mapping**
- **Employee hour tracking** (clock-in / clock-out)
- **Sales reporting:** (daily, weekly, monthly, yearly)
- **Scale support:** CAS, Brecknell, Datalogic
- **Transaction browser –** review & reprint
- **Intuitive, user-friendly interface**
- **Third-party payment integration**
- **Customizable keyboard layouts**
- **Email receipts and reporting**

PCProg®

Back-Office Management Utility

Manage your store faster and more efficiently with **PCProg® — the optional desktop companion** to your APOS system. Update items, pricing, inventory, and menus in seconds, make bulk changes in one go, and push updates to multiple APOS devices without slowing down your day.

Your Store's Back-Office Command Center

PCProg® is designed to make GoPOS programming faster and more efficient. While all functions can be performed directly on GoPOS, PCProg offers a larger screen, mouse control, and built-in edit checks to simplify layout design and reduce setup errors. It also allows users to download and retain cleared reports, make bulk changes, and push updates to multiple APOS units simultaneously—ideal for back-office environments with a PC and LAN.

Rear View (customer display)

Core Features:

- **Batch update** and configure multiple APOS units
- **Organize** departments, modifiers, and menus
- **Import or export** product lists for fast setup
- **Make bulk changes** to items and pricing
- **Track stock** received, sold, and adjusted
- **Customize** layouts and workflows

Hardware Features

* 3 1/8" Thermal Printer w/Auto Cutter
* 15.6" Touch Screen Display (1920 x1080p)
* 15.6" Customer Display (1920 x1080p)
* Power Supply 12V 5A
